

Abolfazl Abbasi

AI Engineer · NLP & LLM Systems · Financial AI · DevOps

PROFESSIONAL SUMMARY

AI Engineer with 4+ years of experience designing and deploying NLP, LLM, and computer-vision systems across financial, legal, and e-commerce domains. Proven track record in RAG pipeline development, transformer fine-tuning, real-time data processing, and DevOps automation. Skilled at taking projects from data collection and model training through to production deployment and monitoring.

WORK EXPERIENCE

AI Engineer & DevOps Developer

Oct 2025 – Present

Arnika

- Built an image search system with a custom REST API, enabling fast visual content retrieval across the product catalog.
- Developed a Retrieval-Augmented Generation (RAG) chatbot assistant for Sepidar accounting software, reducing user support queries.
- Engineered a Telegram & Bale customer-support bot handling order management and product FAQs in real time.
- Designed an Asterisk/Issabel VoIP pipeline: inbound call routing → speech-to-text → automated summarization, sentiment analysis, and intent classification.
- Deployed and localized Nextcloud (Farsi/Jalali calendar); configured GitLab and end-to-end CI/CD pipelines; automated build and deployment workflows.

AI & Automation Developer

Nov 2024 – Apr 2025

Ultruffle (Freelance)

- Delivered CallSale_AI: a real-time AI voice agent for phone-based sales and customer support, integrating live ASR, LLM inference, and TTS.
- Built PPO_IR: an import/export analytics platform with an event-driven crawler, 3-layer ETL pipeline, 6-panel Streamlit dashboard, and Admin API for real-time phytosanitary certificate management.

AI Engineer & Python Developer

Jul 2023 – Apr 2025

Mahroyan Software Industry Co.

- Redesigned a social media scraping system into a modular, scalable architecture covering X (Twitter), Facebook, and Instagram.
- Fine-tuned a BERT-based model for multi-label emotion classification (8 emotions, 3 polarities); implemented human-in-the-loop retraining cycle with senior analyst feedback.
- Architected a Persian legal-assistant chatbot using RAG + ChromaDB vector search + few-/zero-shot prompting; deployed production interfaces via Streamlit and Gradio with Docker.

AI & Quantitative Trading Developer

2023 – 2024

FintechPlus (Freelance)

- Created a custom-labeled candlestick chart dataset and fine-tuned YOLOv8 for technical pattern detection, achieving 97% accuracy; integrated detections into a live trading pipeline.

TECHNICAL SKILLS

Languages & Libraries

Python · asyncio · Pandas · NumPy · scikit-learn · Transformers

AI / ML / NLP

LLMs · HuggingFace · BERT Fine-tuning · YOLOv8 · RAG · Semantic Search · Prompt Engineering · Model Evaluation

Data Engineering

PostgreSQL · MongoDB · Redis · DuckDB · ETL Pipelines · Selenium · BeautifulSoup

DevOps & Tools

Git · GitHub · Docker · Linux · GitLab CI/CD · Nextcloud · Vim

Frameworks

Flask · FastAPI · Streamlit · Gradio · LangChain · PyQt5

Other

MetaTrader · Asterisk/Issabel · Cloudflare Workers · Firestore

EDUCATION

B.S. Software Engineering

Technical Vocational College of Qom
2024 – Present

A.S. Software Engineering

Technical Vocational College of Qom
2022 – 2024

- Engineered an automated Forex trading bot incorporating RSI divergence, price-action strategies, adaptive lot sizing, trailing stops, and Redis-cached real-time news suspension.

AI & Automation Developer

2023 – 2024

MaralBranding (Freelance)

- Built a RAG-powered e-commerce chatbot integrating product catalog data with semantic search for context-aware customer support.
- Developed a PyQt5 desktop application for extracting, filtering, and exporting structured business data from Balad.ir, targeting non-technical sales teams.

PROJECTS

FXBrain AI-powered financial market platform: trading signals, technical/fundamental analysis, smart volatility alerts, backtesting engine, and personalized dashboards.

Technologies: Python, LLMs, REST API, PostgreSQL, Redis

interactive-cv-agent Conversational AI agent for building and exploring professional profiles, with distinct Employee and Employer interaction modes.

Technologies: Python, LLMs, LangChain

nety Full-stack network monitoring dashboard with real-time alerting and device management.

Technologies: Python, Flask, React, Vite

ai-itinerary-generator Serverless travel itinerary generator with async processing, real-time status tracking, and Firestore persistence.

Technologies: Cloudflare Workers, OpenAI GPT-4, Firestore

cafebot Conversational ordering chatbot for coffeeshops via Telegram.

Technologies: Python, LLMs, Telegram Bot API

OPEN SOURCE CONTRIBUTIONS

hiero-sdk-python Contributed to the official Python SDK for Hedera Hashgraph: fungible & NFT token management, consensus transactions, and account/topic queries.

Technologies: Python, Hedera Hashgraph, Blockchain

PUBLICATIONS & RESEARCH

Improving Levenshtein Distance with Reinforcement Learning

Implementation and analysis of RL-based optimization for edit-distance algorithms. (2025)

ADDITIONAL EXPERIENCE

Python & Computer Science Instructor

Oct 2025 – May 2026

Secondary School

- Designed and delivered a year-long Python programming curriculum for students aged 16–17, covering fundamentals to applied problem-solving.
